

# Let's Complete the Pattern

- Look at the pattern below.
- Find the space ship that BELONGS in each empty space.
- Draw a line from each space ship to the empty space where it BELONGS.

The pattern consists of a large circle formed by a dotted line. Inside this circle, there are several smaller shapes representing space ships. The shapes are arranged in a roughly circular pattern. In the center of the large circle, there are three blue circles, each containing a different type of space ship: a red rocket, a purple alien ship, and a yellow-green saucer. The rest of the large circle is filled with various space ships, some of which are identical to the ones in the center, and some that are different. The goal is to identify the correct space ship for each empty space.
